

How to Record at 1080p @ 60fps on iPhone

1. Open the “Settings” icon

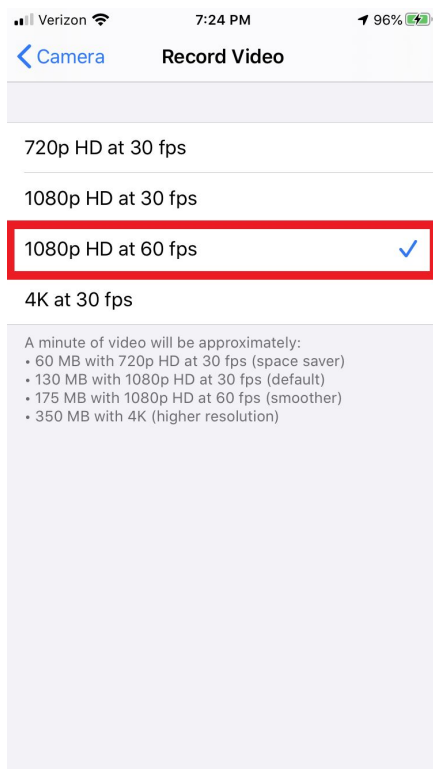

2. Scroll down to the “Camera” settings tab and select it

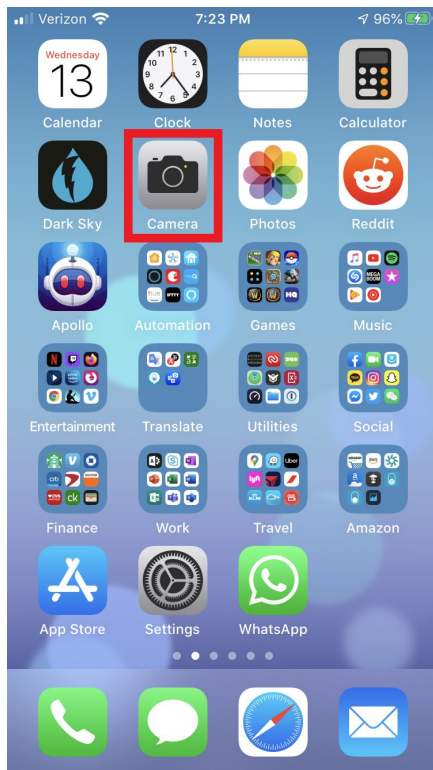

3. Select the “Record Video” settings tab

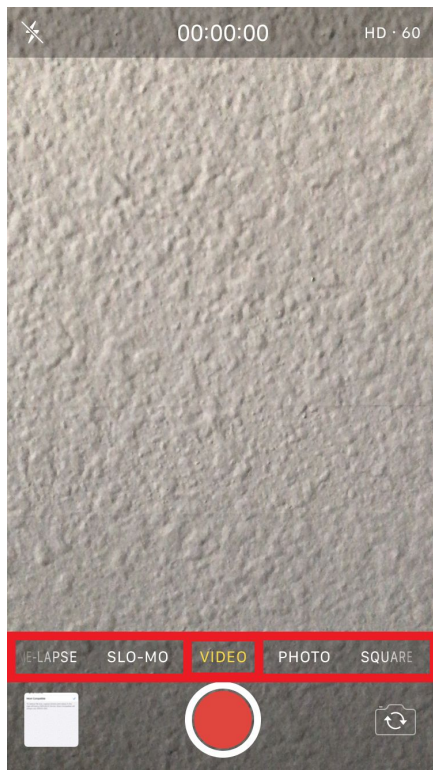

4. Select “1080p HD at 60 fps”

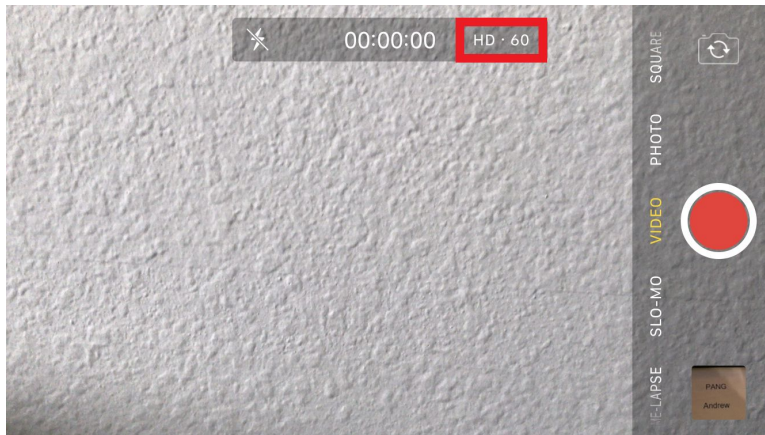

5. Return back to the home screen and open your camera

6. Swipe to the right for “VIDEO” and start recording

7. Rotate your phone to be in landscape mode and you should see “HD · 60” in the top middle of the screen while in landscape mode

8. Make sure to record with the back of the phone camera and don't record after locking the phone and recording from the lockscreen
9. Proceed to the email you received and open the link to your custom upload link
10. Open the website and upload the correct video under each upload location
11. Re-watch your video to ensure the correct video is uploaded
